# Lidded drum - variants

Clamping ring lid

Hooded lid

UN lid

Blending hood

Torospherical lid

With lid handle

Smooth walled

Retaining and side beads

Ultra Clean - beads

Spreading beads

Conical

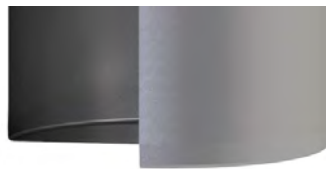

Double body

Stackable bottom

Stackable flat bottom

Flat bottom

Flat bottom with base ring

Torosperical bottom

Lateral bottom outlet

# Lidded drum with stackable bottom

- 
- Cylindrical shape
  - Stackable
  - With retaining and side beads
  - High stability due to the bottom shape

## Lidded drum with stackable flat bottom

- 
- Cylindrical shape
  - Stackable
  - Smooth walled
  - Easy to clean

# Lidded drum with flat bottom and base ring

- 
- Cylindrical shape
  - Non-stackable
  - Smooth walled
  - Bottom protected by welded base ring

# Lidded drum Ultra Clean with flat bottom

- 
- Cylindrical shape
  - Stackable
  - With Ultra Clean beads
  - Easy to clean

# Lidded drum with torospherical bottom

- 
- Cylindrical shape
  - Non-stackable
  - Torospherical bottom for high pressures
  - Safe and stable standing due to welded base ring

# Lidded drum with lateral bottom outlet

- 
- Cylindrical shape
  - Non-stackable
  - Lateral bottom outlet for residue-free emptying
  - Safe and stable standing due to welded base ring

# Lidded drum with double body

- 
- To reinforce the inner body
  - Protection against damage to the inner body
  - For insulating effect
  - For heating and cooling

# Lidded drum conical

- Can be stacked inside another drum to save space in empty condition
- Stackable
- Butt- or roll seam welded
- Volume from 30 to 200 liters in diameter 375 / 450 / 500 / 560
